ABOUT

Programming enthusiast since 2015 and founder of Always Ngoding, with over 6 years of experience in software engineering, specializing in stocks and financial services. Passionate about cybersecurity and an active tech influencer on TikTok and LinkedIn.

EDUCATION

SMK Infokom Kota Bogor, Software Engineering (RPL) Major, 2016 ~ 2019

During my education, I gained extensive programming knowledge through both formal coursework and self-learning. I enjoy collaborating with and assisting friends in learning, actively engage in communication and organization, won several competitions, and was recognized as the best graduate in the technical field.

SKILLS

Go Language, Gin, Fiber, Echo • PHP, CI 3, Laravel • SQL, MySQL, PostgreSQL, MSSQL • CSS, SASS/SCSS, Tailwind, Bootstrap, Materialize • HTML, JS, jQuery, Node JS, React JS, Next JS • Git, Github, Gitlab • Docker, Kubernetes • SEO • Windows Server, Linux Server • Apache, Nginx, IIS • Clean Code • DB or APP Scaling • Dart, Flutter • Pawno • API, REST API, SOAP, AMQP, gRPC, WebSocket • Figma • Ms. Word, Ms. Excel • Problem Solving, Teamwork, Critical & Creative Thinking, Smart Working, Good Communication • Indonesian (Native), English (Basic).

EXPERIENCE

Lead Backend Engineer at Redikru, Feb 2025 - Present

Led a team of Backend Engineers in designing and developing a specialized HRIS application tailored for seafarers and shipping companies, both in Indonesia and internationally. Collaborated closely with key stakeholders including the CTO, Product Owner, QA team, Frontend Engineers, and Data team to ensure seamless integration and delivery. Designed robust, scalable backend infrastructure and database architecture to support high-performance systems. Implemented dynamic business logic to ensure the application's flexibility and adaptability across diverse shipping organizations. Ensured high application uptime and fast response times through proactive monitoring, optimization, and reliable system design. Conducted initial technical interviews for prospective backend engineers, including interns, freelancers, and senior engineers. Evaluated candidates post-interview to support hiring decisions based on technical competence and team fit. Spearheaded the onboarding process for new backend engineers, providing comprehensive guidance on both product knowledge and technical stack.

Sr. Software Engineer at KoinWorks Group, Apr 2022 – Feb 2025

Designed and optimized payment systems for various scenarios, built backend solutions for loan restructuring and credit underwriting, collaborated with external vendors to integrate third-party APIs, proactively monitored and resolved production issues, developed REST APIs, gRPC, cron jobs, and internal admin tools, revamped legacy codebases, partnered with UI/UX designers, frontend engineers, and product managers, and provided production support, mentoring, and comprehensive documentation, significantly improving platform reliability, user experience, cost efficiency, system interoperability, security, and team productivity while ensuring compliance with OJK regulations and financial standards.

Fullstack Engineer & Head of IT at PT Bima Registra, Aug 2019 – Apr 2022

Led the development and maintenance of internal and external websites, managed databases, ensured cybersecurity, and collaborated with third-party vendors to ensure compliance with OJK regulations. Optimized back-end services using Golang to replace PHP, improved website performance by 10x-100x, and managed database scaling. Conducted security penetration tests, ensured 100% uptime for critical platforms such as e-IPO and e-RI, and mentored software engineers through onboarding, code reviews, and technical documentation. Significantly enhanced system reliability, performance, team efficiency, and compliance with ISO 27001 and industry standards.

ACHIEVEMENTS

1st place in PolarDB Global Hackathon 2023 and 1st place in Re-Cloud Challenges 2022, an international competition organized by CodePolitan, Alibaba Cloud, and TIANCHI. Site of the Month for December 2022 and Site of the Month for September 2021 at Indonesia Website Awards (IWA), a national competitions organized by PT Exabytes Network Indonesia. 1st place in Creative & Design Website Competition 2018 at Jakarta State University (UNJ). 1st place in Lomba Kompetensi Siswa (LKS) 2018 and 2nd place in Lomba Kompetensi Siswa (LKS) 2017, a competition in Bogor, with a focus on IT Software Solutions for Business.

PROJECTS

Developed and maintained a wide range of web and desktop applications, including Web Always Ngoding, Web The Cloud Donation, Web kitaSehat, Web News Portal, Web & Desktop App for Cooperative Savings & Loans, Web Student Discipline, Web Digital Guestbook, Web Learning Management System, Web School Library, Web & Mobile App for Postpaid Electric Bill Payment, Web Hotel Reservation, Web School e-Payment, Web Data and Letter Archiving, 6++ Company Profile websites, Web Tour & Travel, Web Wedding Invitation, as well as desktop apps for Attendance, Workshop Management, School Inventory, Parking Management, Restaurant Cashier, Pharmacy, and Student Data Management, along with a Game Server SA-MP (San Andreas Multiplayer).
